

Task: Describe what bats can do.

Bats can do so much. They can use their wings to fly up in the sky. Their wings are dark. Bats hang upside down when they sleep. They sleep in caves or dark places. At night, they look for food so they will have something to eat. They make sounds that help them find insects to eat. Bats are busy.

Bats can do so much. They can use their wide, dark wings to soar into the sky. They fly at nighttime. These mammals hang upside down when they sleep. They sleep during the day in caves or dark places. Bats are insectivores so they eat bugs. They make sounds that help them find prey. They make a special noise. If it bounces back fast, they know the prey is nearby. Bats are interesting!
